

# A Design Automation Roadmap for EUROPE

## Panel discussion

Joseph Borel  
(Moderator and  
Organizer)  
STMicroelectronics,  
France

Jean-Jacques  
Bronner  
Alcatel Business  
Systems, France

Frank Ghenassia  
STMicroelectronics,  
France

Wolfgang  
Rosenstiel  
FZI, Germany

Irmtraud Rugen-  
Herzig  
Infineon, Germany

Anton Sauer  
Medea Office,  
France

Design automation in EUROPE needs to be revitalized through a more cooperative approach of problems and solutions .

MEDEA has been instrumental in bringing cooperation between process and applications and showing weaknesses of design automation solutions with present players . A new burgeoning eclosion of start up's in strategic areas shows good promises in EUROPE .

The goal is to launch new design solutions based on standard market tools complemented by new European start up's early offering in strategic areas . These design solutions will be dedicated to European needs but addressing global worldwide markets .

The aim of this workshop is to debate on the MEDEA design automation roadmap as a European permanent forum for ideas exchanges and new strategic developments for the European industry .
