CALL FOR PAPERS

Conference and Exhibition
March 19-23, 2018
International Congress Center, Dresden, Germany

Scope of the Event
The 21st DATE conference and exhibition is the main European event bringing together designers and design automation users, researchers, and vendors, as well as specialists in hardware and software design, test, and manufacturing of electronic circuits and systems. DATE puts strong emphasis on both technology and systems, covering ICs/SoCs, emerging technologies, embedded systems, and embedded software.

Structure of the Event
The five-day event consists of a conference with plenary invited papers, regular papers, panels, hot-topic sessions, tutorials, workshops, special focus days, and a track for executives. The scientific conference is complemented by a commercial exhibition showing the state-of-the-art in design and test tools, methodologies, IP and design services, reconfigurable and other hardware platforms, embedded software, and (industrial) design experiences from different application domains, such as automotive, wireless, telecom and multimedia applications. The organization of user group meetings, fringe meetings, a university booth, a PhD forum, vendor presentations and social events offers a wide variety of extra opportunities to meet and exchange information on relevant issues for the design automation, design, and test communities. Special space will also be allocated for EU-funded projects to show their results. More details are given on the DATE website (www.date-conference.com).

Areas of Interest
Within the scope of the conference, the main areas of interest are: embedded systems, design methodologies, EDA algorithms and tools, testing of electronic circuits and systems, embedded software, application design, and industrial design experiences. Topics of interest include, but are not restricted to:

- System Specification and Modeling
- System Design, Synthesis, and Optimization
- Simulation and Validation
- Design of Low Power Systems
- Power Estimation and Optimization
- Green Computing Systems and Applications
- Temperature-Aware Design
- Temperature Modeling and Management
- Emerging Technologies for Computing Systems
- Emerging Memory Technologies and Applications
- Formal Methods and Verification
- Network-on-Chip
- Architectural and Microarchitectural Design
- Reconfigurable Computing
- Physical Design and Verification
- Analog and Mixed-Signal Circuits and Systems
- Interconnect and Packaging Modeling
- Communication, Consumer, and Multimedia Systems
- Transportation Systems
- Medical, Healthcare, and Assistive Technology Systems
- Energy Generation, Recovery, and Management Systems
- Secure Systems
- Reliable and Dependable Systems
- Test for Defects, Variability, and Reliability
- Test Generation, Simulation, and Diagnosis
- Test for Mixed-Signal, Analog, RF, MEMS
- Test Access, Design-for-Test, Test Compression, System Test
- On-Line Testing and Fault Tolerance
- Real-time and Networked Systems
- Compilers and Code Generation for Embedded Systems
- Model-based Design and Verification for Embedded Systems
- Embedded Software Architectures and Principles
- Software and Optimization for MPSoCs, Many-core, GPU-based, or Heterogeneous Systems

Submission of Papers
All papers have to be submitted electronically by Sunday September 10, 2017 via: http://www.date-conference.com/
Papers can be submitted either for standard oral presentation or for interactive presentation.
The Program Committee also encourages proposals for Special Sessions, Tutorials, Friday Workshops, University Booth, PhD Forum and Exhibition Theatre.

Conference Organization
K.I.T. Group GmbH Dresden
Bautzner Str. 117-119, 01099 Dresden, DE
Phone: +49 351 4967 541, Fax: +49 351 4956 116
Email: date@kitdresden.de

Chairs
General Chair: Jan Madsen, DTU, Lyngby, DK, jama@dtu.dk
Program Chair: Ayse K. Coskun, Boston University, MA, US, acoskun@bu.edu
