

Panel Session — Automotive System Architectures (Automotive Special Day)

Organiser/Moderator: J. Bortolazzi, DaimlerChrysler, DE

Speakers

J.-L. Maté, SiemensVDO, FR

J. Becker, Karlsruhe U, DE

C. Morgano, Microsoft Europe

This session addresses different approaches to automotive design architectures: state-of-the-art and trends in automotive system architectures from a tier one supplier's perspective, a new approach to reconfigurable architectures as well as a new trend in automotive system design, i.e. platforms to integrate several in-car services and telecommunication services in one configurable approach. The speakers are a mix of industrial and academic experts with experience in automotive system design.
