

Wireless Sensor Networks and Beyond

P. J. M. Havinga
Twente U., NL

Abstract

Wireless sensor networks are a hot issue worldwide, and significant progress has been achieved in the past few years. However, we are only beginning to find out about their real potential, and there are still major challenges that need to be solved. In this presentation an overview of the biggest challenges in wireless sensor networks are addressed, and some of the solutions will be highlighted. Then, some applications of sensor network technologies are presented, which go beyond traditional sensor network applications.
